

SAP BPC will soon be obsolete, putting your financial close at risk.

Here's what you need to know.

Introducing the Financial Close and Consolidation Application from Anaplan

This modern, cloud-native solution offers end-to-end integration of your close, consolidation, and reporting (CC&R) processes to ensure timely, secure, and reliable financial data and insights for your internal and external stakeholders.

Close faster: Automate error-prone and inefficient manual tasks to reduce close process times and free up expensive resources for higher-value activities

Meet regulatory requirements: Meet strict, regulatory reporting deadlines and evolving accounting standards with a transparent and secure single source of truth, and record-to-report audit trails

Report with confidence: Replace static checklists and endless spreadsheets with intuitive workflows and reporting capabilities to gain deeper insights into the financial drivers of your business for accelerated, smarter decision-making

Enhance data protection and user access: Safeguard financial data with resilient security measures and role-based access controls to mitigate risks

Get faster time to value: Benefit from a quick implementation and an easy to use, business-owned solution that elevates your accounting tech stack

Why switch?

It's not just a replacement for SAP BPC, it's a cornerstone to building future of finance leadership and delivering decision excellence. Built by the architects behind OutlookSoft, BPC, IBM Controller and more, the Financial Close and Consolidation Application by Anaplan is:

Out-of-the-box: built-in templates, models, calculations and chart of accounts for implementation in weeks

Finance-owned: intuitive web admin to set up and maintain without reliance on consultants or IT

Excel-based: familiar, full-featured Excel for inputs, exceptions and self-serve reporting

Fully automated: drag-and-drop workflow automation, from data loads to reporting

Controlled & transparent: role-based permissions and audit trails back to the general ledger

Pure play SaaS: security, scalability, performance and the automatic upgrades you didn't get from SAP

Get out before you get stuck

SAP's constantly changing roadmap hasn't made it easy, and now they're planning to:

- End SAP BPC support for Microsoft in 2026, including Excel integration and reporting
- Recommend you purchase additional SAP solutions like Group Reporting and SAP Analytics Cloud in a fragmented approach to achieve basic functionality your accounting team needs to close
- Charge you costly maintenance fees without the support and upgrades you need
- Put your security, compliance and data integrity at risk
- Adopt SAP S/4HANA across all your business entities which can be a multi-year migration process
- Tie up your valuable resources with long implementation times and steep learning curves for your team

Group Reporting won't solve your problems, but it will create more headaches. You deserve the solution that top accounting teams ask for.

The Anaplan difference

Between maintenance, subscription, consulting and migration costs, over the next 5 years, Anaplan's application for Financial Close and Consolidation can help you save big when compared to an SAP Group Reporting migration.

Anaplan offers a more robust, flexible consolidation and reporting solution, and you can have it up and running in about 60+ days.

Worry-free migration from SAP BPC

Our automated migration tool duplicates all your SAP BPC data, metadata and rules.

- ✓ Dimensions and hierarchies
- ✓ Attributes in all your dimensions
- ✓ Mapping tables
- ✓ Models for all facts
- ✓ Opening, conversion, calculation, validation and intercompany rules

Enjoy flexible, self-serve, Excel-based reporting you can't get with SAP.
